Handgun 301 - Advanced Training

This class is designed for the student who desires to become more proficient and dynamic with their handgun. This class is a natural progression from the Handgun 201 course.

The students will review all of the material and techniques covered in Handgun 201, with emphasis again on safety under all conditions. Each student will have to display proficiency in all the techniques from Handgun 201 before moving on to Handgun 301.

The class will cover shooting on targets at unknown distances from different positions, shooting on targets while the shooter is mobile, individual cover and movement, use of existing light, firing with a flashlight, cornering techniques, searching techniques for your house and a lot more.

The practical application aspects of this course will incorporate all of the techniques that are covered in the class. It will also include use of a vehicle and our 360 degree live fire shooting house.

This course is NOT suitable for the grossly unfit, it is very demanding both physically and mentally.
